

Altium Announces Major Product Release

Sydney, Australia – 1 March 2011 - Electronics design software company Altium Limited (ASX:ALU) has started the simultaneous roll-out of a number of updated and new products:

1. Release 10 of Altium's flagship electronics design software product, Altium Designer
2. New server software for electronics data management, Altium Vaults
3. A new web-based ecosystem for electronics designers, AltiumLive

These three products, which are being released following some 18 months of research and development, combine to create a platform for cloud-based data management and collaboration in the electronics design arena.

Altium considers that this product release represents a highly significant point in Altium's history.

Altium Designer Release 10 is the largest release of Altium Designer for several years and provides direct interface from the designer's desktop to cloud-based data-vaults and the AltiumLive ecosystem.

Altium Vaults will be available as both conventional server-based local area network software, and as a cloud-based on-demand data-management solution.

AltiumLive is a completely new web-based eco-system that facilitates collaboration between electronics designers and manufacturing and supply chain partners.

About Altium

Altium Limited (ASX:ALU) creates electronics design software based on the belief that anyone who wants to create electronic products that make a difference should be able to do so. Altium's unified electronics design environment links all aspects of electronics product design in a single application that is priced to be as affordable as possible. This helps electronics designers break down barriers to innovation, harness the latest devices and technologies, manage their projects across broad design 'ecosystems', and create connected, intelligent designs.

Founded in 1985, Altium has headquarters in Sydney, and operates worldwide. For more information, visit www.altium.com.
