

Altium Announces Major Product Release

Sydney, Australia - 6 February 2013 - Electronics design software company Altium Limited (ASX:ALU) has issued a major product release of its flagship electronics design software product, Altium Designer.

Altium Designer 2013 opens up Altium's design platform to its key partners. This is expected to extend Altium's reach beyond its user community into industry partner communities and has laid the foundation to enable the formation of strategic partnerships with additional key players within the industry.

This major product release follows some 18 months of research and development and is the largest release of Altium Designer for two years. Altium Designer 2013 underpins Altium's focus on our core technologies, customers and partners.

Altium Designer 2013 improves the design environment for users by delivering several new features and updates to our core electronic design tools such as an enhanced design capture environment, productivity improvements in printed circuit board design and an upgraded software platform for embedded systems development.

The release of Altium Designer 2013 fulfills a key part of our sales strategy for the second half of FY13 and supports a pipeline of additional capabilities that should enable us to deliver consistent returns to our shareholders.
