Altium needs to solve “the innovator’s dilemma”

As a high performing company Altium needs to achieve dominance through delivering best in class technology and at the same time disrupt the current model through the introduction of a new class of technology that challenges the existing norms.

Converting dominance to transformation requires alignment of industry heavy weights.

Altium’s ability to convert its dominance to compel key stakeholders requires a level of execution that Altium needs to rise to.

For success Altium needs to perform strongly in all three domains at the same time.

Internet of Things & Artificial Intelligence are driving the proliferation of electronics.
Printed Circuit Boards are central to the design & realization of electronics
IOT is Driving the Pace of Innovation

Success depends on the ability to move quickly through innovation cycles.
Current Engineering Tools Fall Short

The current model for tool integration is old and has evolved around the notion of “tool-chains”
The Future of Engineering Tools is Multi-disciplinary...

ECAD and MCAD tools must communicate natively and operate at the same level of abstraction
IOT Requires Transformation of the Electronics Industry

IoT requires the “Uberization” of the Electronics Industry - transforming electronic design and its realization

Altium must target **100,000 active subscribers by 2025** so as to compel key industry stakeholders to support its agenda to transform electronic design and its realization.
Altium’s Long-Term Outlook

- The proliferation of electronics through the rise of smart connected devices continues to drive growth for our business in the foreseeable future.

- Altium is confident of achieving its 2020 target of US$200 million revenue and commits to a higher EBITDA margin floor of 37% (excluding the impact of the new leasing standard).

- Altium is committed to the achievement of 100,000 Altium Designer subscribers before 2025 for market dominance and to an aspirational revenue goal of US$500 million in 2025.

- Altium is anticipating reaching its halfway mark of 50,000 subscribers as early as 2020.

- Altium will continue to pursue partnership and M&A opportunities to support its long-term vision of creating a product design and realization platform that is centered around electronics.

Altium's Journey - a Long History and a Promising Future

1- Altium creates a seamless online and offline design experience for a new breed of designers with Upverter 2.0
2- Altium acquires board manufacturing company PCB-NG, combining it with Ciiva to create the world’s first fully integrated design-to-realization channel
3- Altium acquires Gumstix, a provider of innovative design-to-order hardware and manufacturing solutions providing capability addition in the design-to-realization platform for the long-tail electronics segment and beyond.

The company was founded by creating the first version of Altium Designer, Protel PCB

Altium Launches Protel for Windows - World’s first Microsoft Windows-based PCB design system

Altium Launches Protel for Windows - World’s first Microsoft Windows-based PCB design system

Altium Successfully completes an IPO on Australian Stock Exchange

Altium launches Altium Designer 6, the world’s first Native 3D PCB design software

Altium Launches Protel for Windows - World’s first Microsoft Windows-based PCB design system

Altium launches Altium Designer 6, the world’s first Native 3D PCB design software

Altium launches Altium Designer 3, introducing DXP 2.0, its next generation integration platform opening up Altium Designer to third-party developers

1- Altium acquires Upverter, the developer of the world’s first fully cloud, fully collaborative electronics design systems
2- Altium acquires Ciiva, a cloud based electronic components management system
3- Altium acquires Gumstix, a provider of innovative design-to-order hardware and manufacturing solutions providing capability addition in the design-to-realization platform for the long-tail electronics segment and beyond.

Altium partners with Dassault Systemes SOLIDWORKS to deliver a specialized version of its PCB design software for SolidWorks users

1- Successful capital raising of $44M on ASX
2- Altium relocated its HQ to California USA

1- Altium surpases US$100 million revenue target and delivers $US110 million for financial year 2017
2- Altium acquires Upverter, the developer of the world’s first fully cloud, fully collaborative electronics design systems
3- Altium releases Altium Designer 18 and launches NEXUS
